

TOOLS FOR THE BAD ASS

Achievement System Design

Version 0.4 — WORKING DRAFT

Now with Broadcast Flags, Rarity, UX Spec & Firsts

GameOctane.com

v0.4 LOCKED: Broadcast flags per achievement, rarity display spec, UX spec (toast/bell/drawer), GameOctane flame confirmed for Founding badge, Firsts achievements added. SW name pass and broadcast flags per SW achievement still pending.

CRITICAL FEATURE: STAT CHECK TRACKING

REQUIRED BEFORE ACHIEVEMENT LAUNCH

Stat checks (PP/IP/SP rolls outside combat) currently happen verbally and nothing gets logged. This blocks 10+ achievements from shipping. See separate CC prompt for full feature spec. Short version: /check PP, /check IP, /check SP commands that route through the platform like combat rolls.

Achievements blocked until stat check tracking ships:

- Put... the Candle... Back! — roll a 1 on PP
- We Ain't Found Sh*t! — roll a 1 on IP
- You Can't Handle the Truth — roll a 1 on SP
- These Aren't the Droids You're Looking For — max roll on SP
- Cinderella Story — max roll with stat 1 on a stat check
- Do or Do Not — succeed while debuffed
- That's No Moon... — roll 0 or below after debuffs
- We Ain't Found Sh*t! (IP 1) — failed IP check

BADGE DISPLAY FEATURE

Players choose 3-5 earned achievements to display prominently on their profile. The ones that tell their story. Everyone sees your trophy case but YOU choose what leads.

"Badges? We Ain't Got No Badges!" — the achievement that unlocks the badge display feature. Earn enough badges, now you can show them off. The feature is the reward.

STORY WEAVER ACHIEVEMENTS

PENDING: SW NAME PASS

SW achievements exist and are fully designed but have not received the movie quote / personality name treatment yet. All other categories have been named. SW names are harder — they need to feel like a GM flexing, not a player celebrating. Flagged for next session.

Achievement	Trigger	Tier	Data Field	Notes
If You Build It, They Will Come	Create first campaign	Easy	campaigns_created	Field of Dreams
The Architect	Run 3 campaigns	Medium	campaigns_created

Roads? Where We're Going We Don't Need Roads	Campaign outlasts expected lifespan (1 year+)	Prestige	campaign.created_at	Back to the Future

BROADCAST SPECIFICATION

Every achievement has a broadcast tier that determines how and where it announces. This is baked in at build time alongside point values — not configurable post-launch.

Broadcast Tier	How It Fires	Who Sees It
Personal (Silent)	Toast slides up bottom-right, fades after 5 seconds	Only you
Campaign	Slides in above chat input, visible 10 seconds, no channel pollution	Your entire active campaign party
Global	Notification bell gets red dot, grouped in dedicated feed page	All TBA players on the platform

Tier	Broadcast Level	Rationale
Easy / Onboarding	Personal (Silent)	Nobody needs to know you opened the Lore tab
Shame	Personal (Silent)	Hall of Shame is between you and the dice
Time-based	Personal (Silent)	Account age milestones are noise to others
Medium	Campaign	Your party cares, strangers don't yet
Hard	Campaign	Commitment required — your table earned this moment too
Narrative drops	Campaign	It Was Personal, Houston We Have a Problem — the table was there

Two-part arc completions	Campaign	The punchline lands best at your own table
SW achievements	Campaign	Your players should see you hit Master Weaver
Prestige	Global	INCONCEIVABLE and True Legend are platform moments
Founding / OG	Global	Historic — announce at cutoff
First-ever unlocks	Global	First player EVER to earn True Legend gets a global broadcast

CAMPAIGN BROADCAST FORMAT

Slides in ABOVE the chat input — not inside any channel. Stays 10 seconds then dissolves. The story channel stays clean. This is a system-level event, not a chat message.

GLOBAL BROADCAST FORMAT

Notification bell gets red dot. On login, notifications are GROUPED — not individual spam. Example: "While you were away: 3 campaign achievements, 1 global prestige unlock, 2 new players joined your campaign." Expandable if you want details. Dedicated feed page shows platform-wide prestige moments.

RARITY DISPLAY SPECIFICATION

Every achievement badge displays the percentage of all TBA players who have earned it. This number IS the bragging right. A 0.031% badge hits different than a 45% badge. Three decimal places on ultra rare.

Rarity Tier	Threshold	Visual Treatment
Common	> 25% of players	No special treatment — just the percentage number
Uncommon	10% – 25%	Subtle gold tint on the percentage
Rare	1% – 10%	Percentage glows
Ultra Rare	< 1%	Different color entirely — three decimal places shown
Legendary	< 0.1%	Special badge treatment — animated border or pulse

Rarity is calculated live from real player data. It shifts over time — a badge that was Rare at launch may become Uncommon as more players earn it. The percentage shown is always current.

EXAMPLE

INCONCEIVABLE (natural max with stat 1 in combat, sub 1% base probability) will show something like "0.031%" at launch — gold, glowing, three decimals. That number on your profile is the flex.

LOG DRAWER — PERMANENT RECORD

A persistent drawer (slides from the right) serves as the permanent record of everything the platform does. It is the session receipt and the source of truth.

What Gets Logged	Notes
All die rolls	Stat checks, combat, The Calling — every single roll
Achievement unlocks	With rarity % at the moment it fired — preserved forever
Level ups	
BAP grants	
Effects applied and expired	
Loot awarded	
Scene changes	
Player joins / leaves	

The drawer is NOT a channel — it does not pollute Story or OOC. It is accessed via a scroll/history icon in the header. Click it, the drawer slides out from the right. Invisible when you don't need it.

WHY THIS MATTERS

"Did I actually roll that?" arguments are dead forever. Session recaps write themselves. Achievement hunters can review their roll history. The rarity % on every achievement is preserved at the exact moment it fired. The Log Drawer is the reason achievement tracking is trustworthy.

BADGE DISPLAY & SHAPE SPECIFICATION

Players choose 3–5 earned achievements to display prominently on their profile. The badge shapes are baked into each category — you see the shape and instantly know the category before reading a word.

Category	Badge Shape	Notes
Combat	Burst / impact	Action, aggression — works in any genre
Story / Narrative	Speech bubble	Words, moments, connection
Shame / Hall of Shame	Broken die	You know what you did
The Calling	Cracked hourglass	Death adjacent. Heavy.
Dice / Rolls	d6 shape	Obviously a die
Founding / OG	GameOctane blue flame	SVG asset confirmed in hand — ships as actual brand mark
Prestige	Crown	Reserved. Only the hardest achievements.
SW (Story Weaver)	Open book	The craft of running
Time-based	Hourglass	Clean, universal
Platform / Exploration	Compass	You found something
Companions / Ally	Two figures	
Level	Mountain peak	Upward, earned
v3.0 Bonds / Combos	Interlocked rings	Requires v3.0

FOUNDING BADGE CONFIRMED

The GameOctane SVG (GOcontMR.svg) has been located and confirmed. It is a proper vector asset — scales perfectly at any size. CC should extract the flame mark and ship it as the Founding badge. Someone who was here in 2025 gets the actual GameOctane brand mark on their profile forever.

GRAPHICS TIER PLAN

Tier 1 (launch): Lucide icon + category color + correct shape. Fast to build, consistent, looks intentional. Tier 2 (post-launch): Custom illustrated badges for the iconic ones — INCONCEIVABLE, It Was Personal, Death Knows My Name, OG. Commission or generate as the game grows.

"Badges? We Ain't Got No Badges!" — the achievement that UNLOCKS the badge display feature. Earn enough badges, now you can show them off. The feature is the reward.

FIRSTS ACHIEVEMENTS

Every player has a true first time for everything. These fire once, never again. They are the onboarding layer that makes the platform feel alive from turn one.

Achievement	Trigger	Tier	Data Field	Notes

TBA Achievement System v0.2 — GameOctane.com
Designed on a Monday afternoon — Built with Claude
